

Energy Saving Programs Programs for 2011

Weatherization Program

EPUD can help you install insulation, windows, and duct sealing in your home. In partnership with First Tech Credit Union, we offer zero-interest loans of up to \$4,000 for weatherization. A rebate of \$500 is also available. To see if you qualify, call Energy Services at 541-746-1583 and schedule a Home Energy Analysis. In general, permanent homes, rental homes, manufactured/mobile homes, and multifamily units may qualify if the primary heat source is electric.

Heat Pump Program

EPUD can help you install a heat pump in your home. In partnership with First Tech Credit Union, we offer zero-interest loans of up to \$7,500 for qualifying ENERGY STAR-rated heat pumps. In addition, EPUD offers rebates of \$800 for air-source heat pumps, \$1,500 for ductless heat pumps, and \$2,000 for ground-source heat pumps. State and Federal tax credits are also available for the installation of qualifying heat pumps.

CheckMe!® Program

CheckMe! is a system developed by the Proctor Engineering Group to address problems with heat pump and central air conditioning inefficiencies. CheckMe! can best be described as a "tune-up" for your heating and air conditioning system—a tune-up that relies on specially-trained technicians, modern diagnostic equipment and a database of information on each heat pump/air conditioner brand available. CheckMe! is recognized regionwide as an effective way to improve heating systems, and qualifies for a tax credit through the Oregon Office of Energy. The CheckMe! program is for both existing and new systems.

ENERGY STAR® Homes

Homes built to ENERGY STAR Homes Northwest Program standards will be at least 15% more energy efficient than homes built to the Oregon State Energy Code, by incorporating construction practices and high-efficiency equipment specified by the ENERGY STAR certification requirement. Incentives of up to \$2,000 are available.

NEEM ENERGY STAR Manufactured Home Incentive Program

EPUD is promoting the construction and purchase of energy efficient manufactured housing by offering a rebate to homebuyers purchasing electrically-heated NEEM ENERGY STAR manufactured homes sited within our District. EPUD will offer a \$600 rebate to qualifying homebuyers.

Solar Water Heater Program

Have you considered installing a solar water heater in your home? EPUD currently offers a \$600 rebate and a \$7,500 zero-interest loan toward the installation of a new system. The State of Oregon also offers a tax credit of up to \$1,500.

Refrigerator Recycling

Old refrigerators and freezers typically use at least 200% more electricity than newer models. Emerald and its program partner, JACO Environmental, will pick up your old refrigerator or freezer for free, responsibly recycle all the materials, and give you a \$30 credit on your EPUD bill. Units must be in working condition and at least 10 cubic feet. Call 866-444-8907 to schedule your pick-up today.

Energy-Efficient Appliance Program

When shopping for a new appliance for your home, remember EPUD has rebates to help you cover the cost of purchasing qualifying ENERGY STAR appliances that are more energy-efficient. We have rebates for qualifying clothes washers, water heaters, refrigerators, freezers and lighting fixtures. For more information, contact EPUD's Energy Services at 541-746-1583. You can also check www.energystar.gov for qualifying ENERGY STAR appliances.

Commercial/Industrial Customers

EPUD also assists ANY of our commercial and industrial customers in making conservation profitable. Our energy professionals will come to your business and perform a free energy audit. We offer cash incentives and technical assistance for qualifying projects. As well, we can manage your project to save you time and effort. Our goal is to make your business more energy efficient and more profitable.

**For questions on any of the above, call
EPUD Energy Services at 541-746-1583.**
