Road and Power Line Improvements

The State’s Safety Corridor on Jasper Road is delayed, and work is in progress on the County’s Bob Straub Parkway.

Jasper Road Safety Corridor

The State is still working out details and timing of its project; now they expect road construction to begin in June. They are clarifying a number of issues, among the State, Wildish Construction, EPUD, and the State’s engineering firm.

Bob Straub Parkway

Work is progressing on this County project. They still intend to be finished by September, and then we’ll put our poles and lines in after that, which should take about six weeks.

New Bills

We have made a conversion to a new computer system, and it offers some new benefits to our customers. You can sign up for paperless bills via email now. And customers with multiple accounts will have more flexibility—they can have one bill for all, or separate bills. The bills have a new look. If you’d like to see an explanation of everything on the bill, you can visit www.epud.org and click on View or Pay Your Bill, then How to Read Your Bill.

How’s It Going?

We haven’t heard about any reliability concerns lately, and we’re hoping that’s because the power has been uninterrupted. Some of you volunteered to log blinks and outages. If you have information about continuing problems, WE WANT TO KNOW! Please call us at 746-1583 or email jaspermeadows@epud.org. Thank you so much for your ongoing cooperation.

Progress Report

- We have made many improvements to our system that serves the Jasper Meadows neighborhood.
- We invited Jasper Meadows customers to join us for a dinner where we could discuss the reliability problems they were experiencing.
- We’ve sent newsletters and created an email address for your use, and an email list to keep you informed.
- We added a web page on EPUD construction jobs, including the publications and presentations to Jasper Meadows. Visit epud.org, click on Construction & Contractors, Current Construction Jobs, Jasper Meadows.

Planned Outages

The road jobs will require planned outages from time to time and we will give you 48 hours notice of when they’ll occur. But construction can always cause unplanned outages too.
